

**Mechanical Transducer (External Drive)**

**Model: MET2121-B120T**

**ELECTRICAL SPECIFICATIONS**

|                       | Condition              | Parameter | Unit |
|-----------------------|------------------------|-----------|------|
| Operating Voltage     |                        | 110 ~ 130 | VAC  |
| Rated Voltage         | 50~60Hz                | 120       | VAC  |
| Rated Current         | at rated voltage       | Max. 50   | mA   |
| Coil Resistance       |                        | 3600 ± 36 | Ω    |
| Resonant Frequency    |                        | 50 ~ 60   | Hz   |
| Sound Pressure Level  | at 10cm, rated voltage | Min. 85   | dB   |
| Terminal              |                        | Plate     |      |
| Operating Temperature |                        | -10 ~ +45 | °C   |
| Housing Material      |                        | PBT       |      |
| Colour                |                        | Black     |      |
| Weight                |                        | 18        | g    |

Remark: Internal material PBT change to Nylon.
