

G304E Slide Mute Micro Switch

■ Features

- The G304E micro switch has an innovative structure that achieves high quality and competitive prices.
- Small compact size, high reliability, long life.
- Widely used in the auto control, industry control, etc.
- 11 Types of plastic covers and 6 kinds of terminals for customers.

■ Parameters

Electrical Rating	G304E	0.1A 12VDC 5mA 10VDC
Operating Frequency	Electrical	10~30 Cycles/Minute 1~500mm/s
	Mechanical	120 Cycles/Minute
Contact Resistance (Initial value)		100mΩ Max.
Insulation Resistance		100MΩ Min.
Dielectric Strength		Between Terminals: AC 500V Between Terminals And Covers: AC 1000V
Operating Humidity		-40°C~+85°C
Service Life	Electrical Life	300,000 Cycles
	Mechanical Life	500,000 Cycles

■ Structural Innovation Design Description

Features Description:

1. The spring is below the plunger, making the switch more stable and reliable during the conversion process.
2. Adopt the design of a slide terminal on both sides of the switch so that the switch is in a balanced state.
3. The sealing ring and the plastic cover adopt the hot riveting process to solve the problem of more glue and less glue in the switch. Especial for the poor waterproofing problem.
4. The slide terminal and the pin plunger are buckled together, and the structure is more reliable. Automated production is possible.

■ Application

G304E micro switch is widely applicable in various charging guns, car door lock switches, game machines, drone handles, etc.
